ARTICLE I GENERAL

1.1 Short Title

The short title of this article shall be the "Tunica County Sign Regulations."

1.2 Purpose

The general sign requirements of this Ordinance shall apply to all signs in Tunica County, Mississippi in any zoning district for any purpose subject only to the time compliance requirements hereinafter specified. All signs which are not expressly permitted by this Ordinance are hereby declared to be illegal or nonconforming signs.

The purpose and intent of the sign regulations is to promote and protect the public health, safety, and welfare; provide uniform standards; and to recognize the right of businesses to utilize signage as a

communication method for their businesses. As such, their location, number, size, height, and design have a significant influence and effect upon the visual environment of the area.

Sign regulations should, therefore, protect property values; protect the public from damage or injury caused by or partially attributable to distractions or obstructions which may be caused by improperly situated signs; provide a reasonable balance between allowances for signage and sign regulations; create pleasant and attractive surrounds; discourage visual discord and clutter resulting from the proliferation, over- concentration, and placement of signs; promote and provide signs which do not contribute to unpleasant impressions and potential confusion; enhance the aesthetic qualities of the area; assure that signs are well designed, attractive, and compatible with adjoining properties as well as the uses which they are designed to advertise; and encourage signs which prevent the overload of visual stimuli and are legible in the circumstances in which they are seen.

If the designated person or agency issuing permits questions the compliance of a sign with any of the regulations, the application for a permit shall be forwarded to the Tunica County Planning Commission for action.

1.3 Scope

- A. This article is enacted pursuant to authority granted to the County by Section 17-1-3 of the Mississippi Code of 1972 and other pertinent statutes. It shall apply to all signs erected after the effective date of the ordinance from which this article is derived and to existing signs as specified in Article VI of this ordinance.
- B This article applies to signs which are intended to be viewed from a public right-of-way, such as, highways, roads, streets and alleys, and to signs which are intended to be viewed from outdoor areas of public and private property used for public pedestrian purposes or vehicular access to such property.
- C. This article prescribes definitions, regulations and standards, administration and procedures, permits and payment of fees, and provides for penalties for violation. It regulates height, area, illumination and other similar aspects of signs and sign structures.
- D. This article does not regulate the use of materials such as noncommercial holiday signs and decorations; signs on products, product containers or dispensers; public information and safety signs; any signs required by local, state, or federal law; or building design exclusive of any commercial message.
- 1.4 Relationship to Zoning Ordinance and Other Regulations
 - A. The regulations contained in this article are supplemental to any other applicable federal or state regulations which may be construed as pertaining to the erection and maintenance of signs and sign structures. This specifically includes the zoning ordinance and all building and other construction codes adopted by Tunica County.
 - B. Words and phrases contained in this article not specifically defined are to be construed in the context of other such regulations. In the event of any conflict between these regulations and other such regulations, the more stringent rule shall apply.
 - C. All references in this article to zones, with regard to permitted uses or any other regulations in this article, refer to the zoning districts established by the zoning ordinance and shown on the official zoning map, as amended and on file at the Chancery Clerk's office. Should any zoning classifications be added or changed, the regulations of the most similar existing classification, as determined by the Board of Supervisors upon consideration of the recommendations of the Planning Commission, shall apply until such time as this ordinance may be amended.

D. The regulations in this ordinance shall not apply to planned developments provided that planned development documentation contains a master sign plan element in both graphic and narrative from setting forth comprehensively all signage requirements within the planned development. ARTICLE IV MAXIMUM SIGN AREA AND SIGN LOCATION

4.1 Computation of Area of Individual Signs Except Wall Signs

The surface area of any sign face shall be computed from the smallest rectangles, circles and/or triangles which will enclose all words, letters, figures, symbols, designs and pictures, together with all framing, background material, colored or illuminated areas, and attention-attracting devices forming an integral part of the overall display, but excluding all support structures, except that:

- A. Superficial ornamentation and/or symbol-type appendages of a non-message-bearing character which do not exceed five percent of the surface area shall be exempted from computation;
- B. Wall signs painted on or affixed directly to a building wall, facade or roof, and having no discernible boundary, shall have the areas between letters, words intended to be read together, and any device intended to draw attention to the sign message included in any computation of surface area:
- C. Signs placed in such a manner, or bearing a text, as to require dependence upon each other in order to convey meaning shall be considered one sign and the intervening areas between signs included in any computation of surface area; and
- D. Spherical, cylindrical or other three-dimensional signs not having conventional sign faces shall be considered to have two faces and the area of each sign face shall be computed from the smallest three-dimensional geometrical shape or shapes which will best approximate the actual surface area of said faces.
- 4.2 Computation of Area of Multifaced Signs

A double faced sign shall be allowed the total area of a single faced sign on each face.

4.3 Computation of Height

The height of a sign shall be determined by measuring the vertical distance from the ground level of the sign to the uppermost part of the sign or support structure, whichever is higher.

- 4.4 Special Considerations of Wall Signs
 - A. This section shall govern all wall signs as defined in this Ordinance.
 - 1. Sign Area Permitted Each ground-floor business establishment fronting on and/or oriented toward one or more public street, highway or parkway shall be permitted a maximum of one square foot of wall sign area for each one linear foot of building frontage, except that when individually cut letters are provided, the ratio may be increased to 1.5 square feet of wall sign area for each one linear foot of building frontage. This applies to

all faces of a building with street frontage and each street frontage shall be computed separately.

- 2. Where a ground-floor business establishment fronts only on a parking lot, alley, open mall, landscaped open space or other public way, the exterior building wall facing such parking lot, alley, open mall, landscaped open space or other public way shall be considered a building frontage for purposes of computing permitted wall sign area.

 3. A ground-floor business establishment having entrances intended for and regularly utilized by the public on the side of a building which is not considered building frontage as deemed by this Ordinance, shall be permitted one wall sign on each such side, provided said sign does not exceed one-half said sign area permitted on the building frontage of said business. Where a business has more than one building frontage recognized by this section, an average of the total of the width of all frontages permitted sign areas shall be used to compute the total sign area.
- 4. Any building containing business establishments, which front only on an interior mall having a limited number of entrances, shall be considered a single establishment for the purpose of computing the wall sign area permitted on the exterior walls of such building.
- 5. In the event a side wall sign is permitted pursuant to section A.3 above, the total sign area for such building (including signs on frontage walls and side walls), shall not exceed a maximum sign area permitted by sections A.1 and A.3 above.
- 6. Each ground-floor business establishment, not covered by paragraph A.1 above, and except as limited by paragraph A.4 above, shall be permitted a minimum sign area of 10 square feet for each building frontage.
- 7. Each business establishment located on a second floor and facing the street or highway shall be permitted a maximum of 10 square feet of sign area as a wall business sign.
- 8. In all listed zones, each business establishment located on the ground, or second floor having no building frontage, shall be permitted a maximum of one square foot of sign area facing the street or highway.
- B. Steep Sloping Roofs. That portion of any actual or false roof varying 45 degrees or less from a vertical plane may be considered an extension of the building wall for the purpose of wall business-sign placement.
- C. Height Permitted. Wall business signs shall not extend above the highest point, exclusive of any roof structures, of the roof or parapet.
- D. Lighting. Wall business signs may be internally or externally lighted.
- E. Dimensions. The maximum vertical dimensions of a wall sign box and/or the sign copy shall not exceed two feet, except that the Director may approve taller vertical dimensions for signs located on buildings occupied by large single tenant occupancies and/or for initial capital letters or logos. If a site plan is first submitted and approved by the Director, as provided in this Ordinance, signs greater than a two-foot vertical dimension may be permitted subject to the Director's review and approval of the sign.
